## ***DAILY DEVOTIONAL FROM PASTOR SELL***

### **Tuesday, February 1**

Several years ago, my daughter took a college class on Fibonacci numbers. Even though the concept has been around since 200 BCE it was all new and Spanish (I cannot say Greek because I've studied that) to me. Truthfully, I do not remember much about Fibonacci numbers except for the idea of the spiral. I was reminded of the Fibonacci spiral the other day when I looked at the fishpond. The temperatures had been in the low teens and ice covered most of the pond, only the portion by the waterfall was unfrozen. There in a variety of ice forms was a perfect Fibonacci swirl. The was clear ice and white ice making the wonder pattern.

Isn't it just like God to leave his handiwork all around us and where we least expect it.
