## ***DAILY DEVOTIONAL FROM PASTOR SELL***

### **Wednesday, July 7**

I watched the mating dance of the fireflies the other night. Their bioluminescence was mesmerizing as they darted across the lawn. The females fly close to the ground where they will lay their eggs and the males fly high looking for mates. The little lights flashing on and off at dusk was just beautiful.

I have to admit I would not have thought about these tiny fireflies if I was the creator of the universe. I'd be focused on the big things. Our God, however, has a much broader view of creation. He creates little things like fireflies to delight us and fill us with wonder. Our God is an awesome God!
