DAILY DEVOTIONAL FROM PASTOR SELL

Wednesday, June 16

I have been amazed how God provides for all the animals that come to the garden. There are the berries on the trees and the bushes which provide food during the winter and early spring. Then came the dandelions and the fleshy weeds, followed by the bugs in the grass and the clover. Now the birds and rabbits are feasting on the wild strawberries in the ground cover. The berries are abundant. While I wish they were big enough to pick and use, I am glad they are there for the birds. I am looking forward to what comes next.

So often we want to tell God what we need or want, but if we just look around God provides what is needful and more than we can ask or desire.
