DAILY DEVOTIONAL FROM PASTOR SELL

Tuesday, November 16

There is a soybean field just down the road from the Sheetz on the way to Mount Joy. The field is now brown and will soon be dry enough to harvest. Soybeans are amazing plants. It has been labeled the most important bean in the world. When green it makes a wonderful fresh addition to many foods. You can make tofu and soy milk from it. Soy is the basis of many meat and dairy substitutes. Dried and roasted it is a delicious snack. Soy can be used to make hundreds of chemicals which touch our everyday lives. It is found in places you would never expect like your car's gas tank. Soy even enriches the ground in which it grows.

Soy, like corn, is truly a gift of God given to humanity to utilize for the benefit of all. God has given us the ability to see the possibilities in these plants and to modify them to make them even more useful. The good Lord has set us in a beautiful world and set before us wonders yet unknown.

(PS. The field was harvested 11/8.)
