## ***DAILY DEVOTIONAL FROM PASTOR SELL***

### **Friday, October 8**

Over the last few days, I have noticed the fish in the pond have changed their eating habits. All through the summer they indifferently ate the pellets after I tossed them into the water. Lately they have attacked the food like there was no tomorrow. As the days have gotten shorter and cooler, they have spent more time in the deep part of the pond under the waterfall. They are preparing for their long hibernation over the winter. It is truly a marvel how they know it is time to 'fatten up' for the days ahead.

If you are like me, you tend to put things off. I do not like dusting, so I put it off as long as I can. We can procrastinate over many things. Putting our spiritual lives on hold for more important tasks can leave us short when life gets difficult. Our relationship with God in Jesus Christ is one thing we should not put off until it is too late.
