DAILY DEVOTIONAL FROM PASTOR SELL

Tuesday, September 7

I was driving down Stoney Battery Road again passing the site of this summer's earth moving. I noticed the site had expanded, a house had been removed and several ponds dotted the area following recent rains. Then I was stunned by the arrival of a large dump truck. It was bringing more dirt to the area. There are mountains of dirt already there. Dirt has been moved around for months. Now dirt is being trucked in! My mind buzzed with the thought. Obviously, this project is a work in progress.

Over the years, more than one person has said to me "I did confirmation when I was young, I don't need to go to Bible study." It is like the title of a book from several years ago *All I Really Needed to Know I Learned in Kindergarten*. The truth is we needed to learn a great deal since kindergarten and confirmation – how to drive; sign for a mortgage; and raise a child. The same is true of our Christian life. We grow in our understanding. Our perspective changes. We, too, are a work in progress only Jesus Christ remains the same.
